

FIRST® Robotics Competition

# Team 3992

## "Designate FIRST Robotics as a Varsity Sport"

*Whereas, FIRST Robotics is widely considered the "Varsity Sport of the Mind", and the FIRST Experience engages students in life enriching activities that will stay with them throughout their High School, College, and professional careers, FIRST Robotics should be designated as a Varsity Sport.*

**"FIRST changes lives, and is one of the influential experiences a high school student can have if they let it. The varsity sport for the mind... where anyone can go pro. I wouldn't be the person I am today if it wasn't for FIRST" – Anna Sklenar, CT.**

**"I think it is very important what these kids do that are in robotics. They do every bit as much as the sports teams. The competition and sportsmanship that is involved with robotics compares with other sports and I feel that the kids deserve a school letter" – Bess Moyer, OH.**

**"This is the greatest program in the entire world, and the whole school will benefit from making this a sport" – Andrew Lawrence, CA.**
