

## Do you like robots?

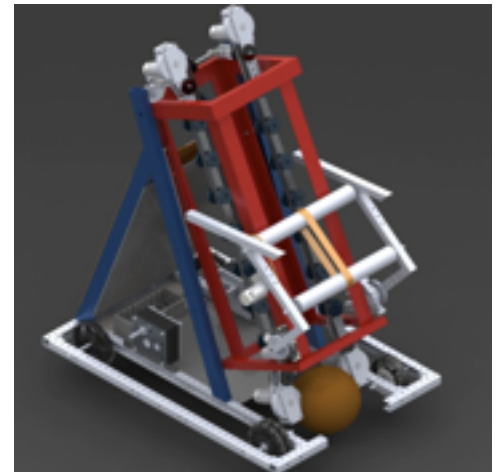

Come visit the Michigan Science Center on **May 4th & 5th** to see FIRST Robotics teams from all across the state demonstrate and host hands-on activities!

See robots from the 2013 competition season operate in live matches!

Talk with team members about their unique design processes, and how to get your own school involved with FIRST!

We look forward to hosting this event, and hope to see you there!

—Team 3641, The Flying Toasters

## **Come visit the Michigan Science Center during its FIRST Robotics Festival!**

On **May 4th & 5th**, FIRST Robotics teams from all across the state will be demonstrating their 2013 robots in live competition matches, running hands-on robotics activities, and hosting presentations at the Science Center for a weekend of fun! Don't miss out on this unique opportunity celebrating education and engineering!

### **What is "FIRST"?**

FIRST (For Inspiration and Recognition of Science and Technology) is the worldwide robotics organization for all school levels. Every year, teams are formed and work beside adult mentors to construct a robot for that season's game. This annual competition provides students with excellent real-world experience by interact-ing with industry professionals, seeking out corporate sponsors, and converging as a team to complete the task at hand.
