register and for more details

The National Education Tour is coming to a stop near you! This tour has one goal - to share SparkFun's passion for electronics with students and teachers across the country. DIY electronics educators will stop in 50 states on 50 dates, teaching lifelong skills such as programming, soldering, and building circuits along the way. Whether you've never played around with DIY electronics or you are a seasoned pro, we will give you the tools, knowledge, and skills you need to explore the wonderful world of how electronics fits with STEM education.
