

Thought starter on eight fields on the floor of the Edward Jones Dome

- (1) This is NOT to scale and only meant as a suggestion. Alignment with tunnels, separation curtains, etc., would be a discussion IF something like this is adopted.
- (2) Do not have ANY coordination between fields during the course of any day. If one field is delayed, two fields are affected. AND volunteers get REAL TIRED.
- (3) Number of teams per field is ANOTHER topic.
- (4) ODD numbered fields have an end look while the EVEN numbered field has the traditional side look. MSC and many other venues have END seating.
- (5) On the second day of competition, fields are pairwise switched so all get same amount of END and TRADITIONAL views of field. That is 1 switches with 2, 3 with 4, and so on.
- (6) Discuss.

Humbly submitted, R2D2DOC.
