

# ROBOWRANGLERS

Team 148, the RoboWranglers of Greenville Texas, welcome you to the *FIRST* championship event. Please accept this HEXBUG Micro Robotic Creature as a token of our friendship. This is a brand new product and you are among the first in the world to get this nifty little robot that debuts in select RadioShack stores next week.

## **The RoboWrangler Top Hand Award**

We're providing one HEXBUG to each team in the hope that it will be awarded to the team member who best exemplifies the *FIRST* values.

And even better, Team 148 has arranged with the folks at RadioShack and HEXBUG for your team to have a chance to fund returning to *FIRST* next year. Enjoy the event and stop by our pit to say howdy!

---

# \$6,000 CASH REWARD

---

**Find the elusive GOLD BUG and your FRC, FVC or FLL team wins \$6,000 cash to fund next season.**

---

Only one HEXBUG Micro Robotic Creature is clad in metallic gold in gold packaging and can be found in a select RadioShack store somewhere in the continental US. Be aware that not all RadioShack stores will carry HEXBUG initially. The **GOLD BUG** won't be hidden – just for sale with the other HEXBUG models. The RadioShack product number for HEXBUG is 60-206. Find the **GOLD BUG** before it disappears, snap a picture of it with your team t-shirt or other team identifier, and look for the secret code on the bottom of the package. Be the first to e-mail the picture and secret code to [goldbug@hexbug.com](mailto:goldbug@hexbug.com) and you'll win enough dough to cover your FRC entry fee for next season or perhaps completely fund your FVC or FLL team! No purchase is necessary and Team 148 will make all final rulings. Hurry and find it before someone snaps it up.

There are five HEXBUG models. Don't confuse ALPHA (orange) or DELTA (yellow) with the **GOLD BUG**. The one and only real **GOLD BUG** will have a distinctive metallic gold finish and will be in gold packaging with the clearly marked **GOLD BUG** secret code on the bottom of the package. Good luck! Visit [www.hexbug.com](http://www.hexbug.com) for more details.
