Eclipse C++/Java (2015)	Never			X	N/A	2015
C++11 Toolchain for cRIO *	Never	X	X		v52	2014

* Open Source project located at http://firstforge.wpi.edu/sf/projects/c--11_toochain

- LabVIEW 2014 License never expires (unlike earlier and later versions)
- It isn't recommended to install LabVIEW 2015 on top of LabVIEW 2014.
  - Recommend saving LabVIEW 2014 DVD, License, and Update, and install on different computer.
- An Eclipse solution for the 4 Slot cRIO may be available in the future per http://forums.usfirst.org/showthread.php?23943-Legacy-C-Programming-Support-for-cRIO&p=92407#post92407
