

\$13.8-MILLION

The amount of college scholarships being given out this year by FIRST®, an international science and technology program, to students involved in the FIRST® Robotics Competition.

We're talking money for schools such as Case Western Reserve University, Ohio State University, Carnegie Mellon, and MIT, along with *many* other universities across the nation, so there's a very good chance that you will be **saving money** next fall, no matter where you plan on furthering your education.

The best part? Becoming eligible for most of the scholarships is as simple as participating on the **Bedford Robotics** team!

Not interested in engineering or programming? **No problem!** Bedford Robotics have a wide range of student positions, including web design, 3D modeling, business management, public relations, and more. Plus, a lot of the scholarships are available for non-engineering majors. So join one of the most **rewarding** clubs in school!

We're not just about building robots; we're about building careers.
