

FUN AND EXCITING

If someone used these words to describe a robotics team, you'd think they're crazy.

There is an atmosphere full of excitement and joy at every FIRST® Robotics Competition event. There are mascots, bright colors, dancing, and a lot of shouting and cheering. It's pretty much your standard sporting event, except you played a huge role in the success of the team! (That's the "no other" part)

Pictures are worth a thousand words, but the budget only allowed us 3,000:

Here at Bedford Robotics, we're also planning some pretty cool community activities and events, like pancake breakfasts and movie nights. There's no other high school organization like it. Don't take this poster's word for it, though! Join us for the next meeting listed below.

We're not just about building robots; we're about building fun times.
