

Team 2137 invites you to our 8th annual Week Zero practice/ build event!

Saturday, 15 - Sunday, 16, February 2020

8:00am-4:00pm

At Oxford High School

745 North Oxford Road

Oxford, MI, 48371

Every team is welcome to attend. This is not by any means a formal event. You don't even need a complete robot! We have had teams show up with next to nothing and leave with a full bot that made it to worlds.

We will have...

1. A full-size field for teams to practice on.
2. Our full engineering lab, open to all teams who attend, including our full fabrication shop.
3. Many experienced mentors, students, and alumni ready to help whoever asks.
4. Concessions.

RSVP info

We are limited to 30 teams per day

Please contact Kit Grabowski if you would like to attend.

kit.robotics@gmail.com

Hope to see you there!
