

WELCOME TO THE COMPETITION!

MEET 9255 BOTMASTERZ - AN ALL-GIRLS ROBOTICS TEAM!

What is Reefscape?

Reefscape is this year's thrilling challenge, where robots navigate an underwater-themed arena to complete various tasks. Teams work together to collect and place game pieces, navigate obstacles, and score points through strategic teamwork and robot design. The goal is to maximize efficiency and outmaneuver the competition while embracing FIRST's core values of Gracious Professionalism and Coopertition!

How Do Matches Work?

- Each match features two alliances (red and blue), made up of three teams each.
- Teams are randomly assigned alliances for qualifying matches and later compete in elimination rounds.
- Matches consist of an autonomous period, where robots operate independently, followed by a teleoperated period, where drivers take control to complete tasks and score points.

Match Schedule

- Teams compete in multiple qualification matches throughout the day.
- The top-performing teams move on to the playoff rounds.
- Announcements are made before each match, so be sure to listen for Team 9255!

Visit us in the Pit!

Come visit Team 9255 Botmasterz in the Pit Area! Here, we:

- Work on our robot between matches.
- Answer any questions you have about our team and the competition.
- Have fun giveaways for visitors—so don't forget to stop by!

PS- Safety goggles are needed for the pit area. Bring your own or text one of the team members for guest goggles.
